PROFILE

7 years designing products end-to-end from problem framing and research to UX, UI, and design systems working closely with founders, PMs, BAs, and engineers.

The last few years have been spent embedding AI into that process like prototyping with it, pressure-testing problems with it, and building with it from scratch.

SKILLS

I specialize in **Product Design**, because of which I hold an unique understanding of

User Research, Information Architecture, Design Systems, User Journey Mapping, Competitor Audits, Wireframing, Quick and Interactive Prototyping, Usability Testing, Mixed Method Testing, Agile UX and Prompt Engineering.

Software that I'm familiar with

- ***Figma(Design, Figjam, Make & Slides)***
- ***ChatGPT, Gemini, Claude & Perplexity***
- ***UX Pilot, Relume, Banani***
- ***Microsoft Clarity, Mixpanel & UXCam***
- ***Adobe Photoshop, Illustrator & InDesign***
- ***Notion***
- ***Jira***

EDUCATION

BCA AI/ML

Shoolini University

Professional Diploma in Design and Digital

School of Design and Media

Higher Secondary - Science

DAV Public School, ECL Pandabeswar

WORK EXPERIENCE

Finvasia | Sr. Product Designer

May 2025 - Present

- Joined as the first product designer in the organization which meant **building the design culture from scratch.**
- **Integrated AI tools into early brainstorming** to rapidly convert vague requirements into visual prototypes, turning ambiguity into something the team could actually react to and refine.
- **Reduced feature development lifecycle** through structured handoff guides, fewer back-and-forths, cleaner ROI for business.
- **Implemented UX analytics tool** to replace assumption-based decisions with real behavioral data.
- **Improved cross-functional collaboration** by giving design, dev, BA and PM a shared process language
- **Mentored team members** on UX thinking, building UX literacy across non-design functions.
- **Key Projects**
  - **Shoonya**: Complete redesign of web trading platform and mobile app
  - **sensAI**: AI-powered multi-agent intelligence system built for financial clarity; first-of-its-kind at Finvasia
  - **Jumpp**: AI-powered neobanking app, end-to-end product design

DigiMantra | Sr. UX Designer

Oct 2024 - Apr 2025

- Worked on a key enterprise client, **heavy data-intensive** platforms and multiple **AI-based** solutions.
- **Designed and managed** complex, data-heavy product interfaces where clarity under information overload was the core challenge .
- **Built and maintained the Design System**, ensuring consistency across a large-scale product.
- **Researched and applied AI** in early-stage prototyping reducing time-to-feature and improving the pace of product delivery.
- **0→1 product builds** using AI-assisted workflows, cutting costs and accelerating business growth.

ACHIEVEMENTS

- **Best Employee Performer of the Year** - Tutelage · 2020 & 2021 (2 consecutive years)
- **Dream Team Award - Tier5**
- **First to introduce AI-assisted prototyping** workflows at Finvasia adopted across product and engineering teams.
- **Designed sensAI first-of-its-kind** AI multi-agent trading intelligence system in the Indian trading space
- **Built UXMantra independently** an AI agent for designers, using Gemini API, from concept to deployed prototype
- **Achieved 85% usability score** on enterprise platform at DigiMantra validated through structured usability testing

Tier5 | UX Designer
Sept 2022 - Sept 2024

- **Worked embedded in an agile team sprints,** stakeholder sessions with the CEO and MD, and the full cycle from fuzzy requirement to shipped screen.
- Designed the core UI for Friender and built the design system from the ground up. **The system removed the friction between design and engineering** handoffs became cleaner, **disagreements dropped**, and **feature shipping moved 3x faster.**
- **Did the foundational research work** competitor analysis, empathy mapping, journey mapping so decisions had ground to stand on, not just instinct.

Tutelage |Graphic/UIX Designer
Sep 2019 - Aug 2022

- Started here as the only designer **owning everything visual**, from social media posts to website banners to print. No handoffs, no safety net.
- Worked directly alongside the CEO, which gave **early exposure to how business actually operates how design decisions connect to revenue, not just aesthetics**. That context shaped how I've thought about design ever since.
- **Produced 1000+ creatives** across digital and print channels contributing to measurable growth in engagement and brand presence. Also co-initiated campaigns and events tied directly to revenue targets.
- **Revamped the company website (sdmedu.in) and worked on the product 1stcollege.com** and it was here that UX clicked. Seeing how real users interacted with something I'd built made the gap between "looks good" and "works well" impossible to ignore.
